

Ho Duc Vinh

FULLSTACK/ BACKEND DEVELOPER

Phone: 0979 205 738
Date of birth: 07/01/2004
Address: Ha Noi, Viet Nam
Email: hoduvinh2k4@gmail.com

ABOUT ME

Backend/Fullstack developer with Spring Boot and Node.js, having independently built and deployed two production-style systems from database design to Docker deployment. Experienced in RESTful API design, JWT authentication, and clean layered architecture. Currently seeking a Backend/Fullstack Intern or Fresher role to apply and grow these skills in a real product team.

Portfolio: <https://ducvinh.space>

EDUCATION

10/2022 - 12/2027

Academy of Cryptography Techniques - KMA

Major: Information Technology

GPA: 3.2/4.0

SKILLS

Backend:

Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, RESTful API, ExpressJs

Frontend:

ReactJS, NextJs, TypeScript, TailwindCSS

Database & Auth:

MySQL, Postgresql, MongoDB, JWT Authentication

Architecture & Clean Code:

DTO Mapping, Global Exception Handling, Clean Architecture Principles

Developer Tools:

Git, Github, Postman, IntelliJ IDEA, VS Code, Docker

Languages:

English: Toiec 805

PERSONAL PROJECTS

08/2025 - 02/2026

FULLSTACK DEVELOPER - BOOKSTORE E-COMMERCE PROJECT

Position: Fullstack Developer

- Built an online bookstore system with book search, browsing, cart, and order management features.
- Designed a MySQL database schema and developed 10+ RESTful APIs for books, categories, cart, and orders.
- Implemented Spring Security + JWT for authentication, authorization, and secure access control across multiple roles.
- Applied layered architecture, DTO mapping, validation, and global exception handling in 8+ business modules.
- Developed the frontend with React, TypeScript, and Material UI, and integrated a Google GenAI chatbot for book recommendations.
- Added order confirmation email notifications and containerized the application with Docker using 4 services for consistent development and deployment.

Github: https://github.com/hoduvinhh/book_selling_website_project.git

Tech Stack: ReactJS, TypeScript, React Router, Material UI, Context API, Java, Spring Boot, Spring Security, JWT Authentication, Spring Data JPA, Hibernate, Spring Data REST, MySQL, RESTful API, Docker, Cloudinary

03/2026 - 07/2026

FULLSTACK SOCIAL NETWORK APPLICATION

Position: Fullstack Developer

- Engineered real-time messaging (1:1 and group chat) using Socket.IO with online status, built a full social feed system (posts, likes, comments, 24h auto-expiring stories) across 11 MongoDB models, 7 controllers, and 8 REST routes.
- Built end-to-end friend request workflows (suggestions, mutual friends) and customizable profile features with visibility controls, delivered through 5 frontend pages and 8 frontend services.
- Implemented secure JWT auth with 2 token types (access/refresh) and HTTP-only cookies.
- Designed scalable, modular RESTful APIs using Express.js and MongoDB/Mongoose, organized around 8 route modules and 1 realtime socket layer.

Github: <https://github.com/hoduvinhh/social-network-app.git> / Demo: <https://social.ducvinh.space/>

Tech Stack: ReactJS, TypeScript, Tailwind CSS, Zustand, Axios, Express.js, MongoDB, Socket.IO, JWT Authentication, Cloudinary.
